Judul : Persepsi dan Harapan Perempuan dengan Kanker Serviks Terhadap Asuhan Keperawatan Spiritual di RSUP Dr. Hasan Sadikin Bandung : Studi Fenomenologi

Asuhan keperawatan spiritual diberikan untuk memenuhi kebutuhan spiritual perempuan dengan kanker serviks. Tujuan penelitian ini untuk menggali lebih dalam tentang persepsi dan harapan perempuan dengan kanker serviks terhadap asuhan keperawatan spiritual. Penelitian ini menggunakan penelitian kualitatif dengan pendekatan *studi fenomenologi* deskriptif. Sampel ada enam partisipan dengan menggunakan *purposive sampling*. Analisis data menggunakan Colaizzi, diperoleh lima tema utama yaitu pengalaman perempuan pada awal didiagnosa kanker serviks, pengalaman perempuan terhadap kebutuhan spiritual, dukungan spiritual yang diberikan perawat, harapan terhadap penyediaan sarana ibadah dan harapan terhadap asuhan keperawatan spiritual. Saran perlu adanya standar asuhan keperawatan spiritual yang baku.

Kata kunci :
persepsi, kanker serviks, asuhan keperawatan spiritual
